Allowable Subject Matter

Claims 1-9 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record does not disclose or render obvious a process, as called for in claims 1, and an apparatus as called for claim 9, in which there is a steam pyrolysis step/zone for converting ethane and/or propane to ethylene and/or propylene, a first FCC step/zone for cracking a stream comprising olefins having at least 4 carbons to form ethylene/propylene and a second FCC step/zone for cracking a refinery stream containing gas oil/full range gas oil/resid to produce ethylene/propylene. These effluents are then quenched, combined, conditioned and separated, and recycled. The closest art - Leyshon et al (5,026,935) - discloses a process for production of ethylene. However, Leyshon discloses using only one cracking step/zone and a metathesis step/zone in combination to produce ethylene (see figures, the abstract).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thuan D. Dang whose telephone number is 571-272-1445. The examiner can normally be reached on Mon-Thu.
